

Human PILR-β PE-conjugated Antibody

Antigen Affinity-purified Polyclonal Sheep IgG Catalog Number: FAB4189P 100 TESTS

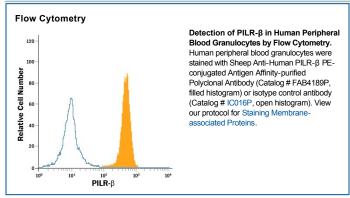

| DESCRIPTION | | | |
|--------------------|--|--|--|
| Species Reactivity | Human | | |
| Specificity | Detects recombinant human PILR-β in direct ELISAs and Western blots. In Western blots, approximately 10% cross reactivity with recombinant human PILR-α is observed and less than 5% cross-reactivity with recombinant mouse (rm) PILR-β, rmPILR-α, and rmPILR-observed. | | |
| Source | Polyclonal Sheep IgG | | |
| Purification | Antigen Affinity-purified | | |
| Immunogen | Mouse myeloma cell line NS0-derived recombinant human PILR-β isoform 1 Gln20-Ala189 Accession # Q9UKJ0 | | |
| Conjugate | Phycoerythrin Excitation Wavelength: 488 nm Emission Wavelength: 565-605 nm | | |
| Formulation | Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. | | |
| | *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Shee (SDS) for additional information and handling instructions. | | |

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

| | Recommended Concentration | Sample |
|----------------|------------------------------|-----------|
| Flow Cytometry | 5 µL/10 ⁶ cells | See Below |

DATA

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage

Protect from light. Do not freeze.

• 12 months from date of receipt, 2 to 8 °C as supplied.

BACKGROUND

Paired immunoglobulin-like, type 2 receptor beta (PILR-β) is a type I transmembrane (TM) glycoprotein belonging to the Ig superfamily. It is the activating counterpart to the ITIM-bearing PILR-α inhibitory receptor. PILR-β is expressed in a wide variety of hematopoietic cells, including NK cells, macrophages, dendritic cells and neutrophils. Mature human PILR-β is a 208 amino acid (aa) protein with one V-type Ig-like extracellular domain, a truncated cytoplasmic tail, and a positively-charged residues in its TM domain that interacts with ITAM-bearing adaptor molecules. Over aa 20-189, in their ECD, human PILR-β and PILR-α share 82% aa sequence identity. The aa sequence of mouse PILR-β ECD is only 43% identical to that of human PILR-β ECD.
