Rat CXCR2/IL-8 RB Alexa Fluor® 647-conjugated Antibody

Monoclonal Mouse IgG_{2B} Clone # 866614

Catalog Number: FAB8110R

100 µg

DESCRIPTION

Species Reactivity	Rat
Specificity	Detects rat CXCR2/IL-8 RB in direct ELISAs. In Flow Cytometry, stains HEK293 cells transfected with rat CXCR2/IL-8 RB, but does not stain non-transfected cells.
Source	Monoclonal Mouse IgG_{2B} Clone # 866614
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	NS0 mouse myeloma cell line transfected with rat CXCR2/IL-8 RB Accession # P35407
Conjugate	Alexa Fluor 647 Excitation Wavelength: 650 nm Emission Wavelength: 668 nm
Formulation	Supplied 0.2 mg/mL in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: *Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.*

	Recommended Concentration	Sample
Flow Cytometry	0.25-1 µg/10^6 cells	Rat peripheral blood granulocytes and HEK293 human embryonic kidney cell line transfected with rat CXCR2/IL-8 RB and eGFP

PREPARATION AND STORAGE

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	**Protect from light. Do not freeze.** ● 12 months from date of receipt, 2 to 8 °C as supplied.

BACKGROUND

CXCR2 is an approximately 40 kDa 7-transmembrane domain receptor for the ELR+ chemokines CXCL1, 2, 3, 5, 6, 7, 8 and MIF. CXCR2 is expressed on neutrophils, monocytes, eosinophils, basophils, mast cells, T cells, oligodendrocytes, airway smooth muscle cells, and vascular endothelial cells. It is additionally upregulated in several cancers. CXCR2 can associate into homodimers or heterodimers with CXCR1, CXCR4, CD74, or the delta Opioid Receptor. CXCR2 plays an important role in attracting immune cells to sites of inflammation followed by their adhesion and extravasation. It is also involved in angiogenesis, the development of inflammatory disorders, and cancer. Rat CXCR2 shares 71% and 86% amino acid sequence identity with human and mouse CXCR2, respectively.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
