

DESCRIPTION

Species Reactivity	Human/Mouse
Specificity	Detects human and mouse ELF3 in Western blots.
Source	Monoclonal Mouse IgG _{2B} Clone # 662533
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	<i>E. coli</i> -derived recombinant human ELF3 Met1-Gly173 Accession # P78545
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS with Trehalose. See Certificate of Analysis for details. *Small pack size (-SP) is supplied as a 0.2 µm filtered solution in PBS.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. *General Protocols* are available in the *Technical Information* section on our website.

	Recommended Concentration	Sample
Western Blot	0.1 µg/mL	See Below

DATA

PREPARATION AND STORAGE

Reconstitution	Sterile PBS to a final concentration of 0.5 mg/mL.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below. *Small pack size (-SP) is shipped with polar packs. Upon receipt, store it immediately at -20 to -70 °C
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. <ul style="list-style-type: none"> ● 12 months from date of receipt, -20 to -70 °C as supplied. ● 1 month, 2 to 8 °C under sterile conditions after reconstitution. ● 6 months, -20 to -70 °C under sterile conditions after reconstitution.

BACKGROUND

ELF3 (E74-Like Factor 3; also ESE-1, ESX, ERT and JEN) is a 41-43 kDa member of the ETS family of proteins. During uncomplicated (non-inflammatory) periods of cell differentiation, ELF3 is expressed exclusively by epithelial cells, repressing genes needed during early differentiation, and promoting genes needed for full differentiation. Under conditions of inflammation, cells such as monocytes, endothelial cells and chondrocytes express ELF3 and produce molecules such as Ang1 and COX2. Human ELF3 is 371 amino acids (aa) in length. It contains one PNT/pointed dimerization domain (aa 46-132), a protein stabilizing PEST sequence (aa 210-225), an A/T Hook region that binds to AT-rich DNA sequences (aa 236-252), and an ETS DNA binding domain (aa 273-355). ELF3 interacts with CREBBP, EP300, KU70 and KU86. There is one splice variant that shows a deletion of aa 174-200. Over aa 1-173, human ELF3 shares 87% aa identity with mouse ELF3.
