MANBA antibody

Catalog No: #22166

Description

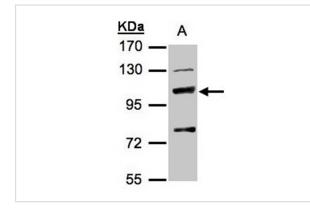

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Product Name MANBA antibody Rabbit Host Species Clonality Polyclonal Purification Purified by antigen-affinity chromatography. WB Applications Hu Species Reactivity Recombinant protein Immunogen Type Recombinant protein fragment contain a sequence corresponding to a region within amino acids 380 and 624 Immunogen Description of Human MANBA Target Name MANBA NCBI Gene ID: 4126NCBI mRNA#: NM_005908NCBI Protein#: NP_005899 Accession No. Formulation Supplied in 0.1M Tris-buffered saline with 10% Glycerol (pH7.0). 0.01% Thimerosal was added as a preservative. Storage Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details Predicted MW: 101kd Western blotting: 1:500-1:3000

Sample(30 ug of whole cell lysate) A: Hep G2 7.5% SDS PAGE Primary antibody diluted at 1: 500

Background

This gene encodes a member of the glycosyl hydrolase 2 family. The encoded protein localizes to the lysosome where it is the final exoglycosidase in the pathway for N-linked glycoprotein oligosaccharide catabolism. Mutations in this gene are associated with beta-mannosidosis, a lysosomal storage disease that has a wide spectrum of neurological involvement. [provided by RefSeq]

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
