Product Name	Precerebellin Antibody	
Host Species	Rabbit	
Clonality	Polyclonal	
Purification	Affinity chromatography purified via peptide column	
Applications	E WB IHC	
Species Reactivity	Hu Ms Rt	
Immunogen Type	Peptide	
Immunogen Description	Raised against a 15 amino acid peptide from the middle of human precerebellin.	
Target Name	Precerebellin	
Other Names	Cerebellin precursor, Cbln1	
Accession No.	P23435	
Formulation	Supplied in PBS containing 0.02% sodium azide.	
Storage	Can be stored at -20°C, stable for one year. As with all antibodies care should be taken to avoid repeated	
	freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.	

Images

Western blot analysis of precerebellin in mouse cerebellum lysate with precerebellin antibody at (A) 2 and (B) 4 μ mL.

Immunohistochemical staining of rat brain tissue using precerebellin antibody at 2 ug/mL.

Background

Precerebellin is the precursor of the brain-specific hexadecapeptide cerebellin, a protein with substantial similarity to the globular region of the B chain of complement component C1q. Cerebellin exerts neuromodulatory functions by directly stimulating norepinephrine release via the adenylate cyclase/pka- dependent signaling pathway; and indirectly enhances adrenocortical secretion in vivo, through a paracrine mechanism involving medullary catecholamine release. The active form of precerebellin is highly enriched in postsynaptic structures of cerebellar Purkinje cells in cartwheel neurons of the dorsal cochlear nucleus. Because precerebellin belongs to the C1q/tumor necrosis factor superfamily of secreted proteins and has similarity to adiponectin and CTRP3, it has been suggested that precerebellin possesses functions other than those already stated.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
