ERG Antibody

Catalog No: #32251

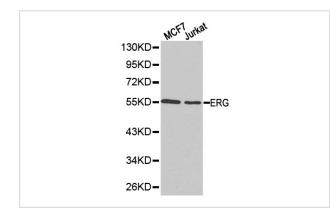

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| | · . | |
|----|-------|-------|
| ٦. | aecri | ption |
| _ | 03011 | |

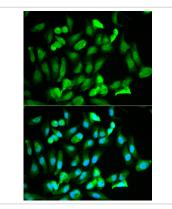

| Product Name | ERG Antibody |
|-----------------------|--|
| Host Species | Rabbit |
| Clonality | Polyclonal |
| Purification | Antibodies were purified by affinity purification using immunogen. |
| Applications | WB IHC IF |
| Species Reactivity | Hu Ms Rt |
| Specificity | The antibody detects endogenous level of total ERG protein. |
| Immunogen Type | Recombinant Protein |
| Immunogen Description | Recombinant protein of human ERG. |
| Target Name | ERG |
| Other Names | ERG; erg-3; p55; |
| Accession No. | Swiss-Prot:P11308NCBI Gene ID:2078 |
| SDS-PAGE MW | 55KD |
| Concentration | 1.0mg/ml |
| Formulation | Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% |
| | sodium azide and 50% glycerol. |
| Storage | Store at -20°C |

Application Details Western blotting: 1:500 - 1:2000 Immunohistochemistry: 1:50 - 1:100 Immunofluorescence: 1:50 - 1:200

Images

Western blot analysis of extracts f MCF7 cell and Jurkat cell using ERG antibody.

Immunofluorescence analysis of HeLa cell using ERG antibody. Blue: DAPI for nuclear staining.

Background

This gene encodes a member of the erythroblast transformation-specific (ETS) family of transcriptions factors. All members of this family are key regulators of embryonic development, cell proliferation, differentiation, angiogenesis, inflammation, and apoptosis. The protein encoded by this gene is mainly expressed in the nucleus. It contains an ETS DNA-binding domain and a PNT (pointed) domain which is implicated in the self-association of chimeric oncoproteins. This protein is required for platelet adhesion to the subendothelium, inducing vascular cell remodeling. It also regulates hematopoesis, and the differentiation and maturation of megakaryocytic cells. This gene is involved in chromosomal translocations, resulting in different fusion gene products, such as TMPSSR2-ERG and NDRG1-ERG in prostate cancer, EWS-ERG in Ewing's sarcoma and FUS-ERG in acute myeloid leukemia. Multiple alternatively spliced transcript variants encoding different isoforms have been identified.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
