

**Product Specification**  
**Recombinant Human Hepatocyte Growth Factor (rhHGF)**

- **Source**

CHO Cell.

- **Package**

Frozen material.

Each polypropylene vial includes 1 µg of rhHGF in 100 µL of 10 mM sodium phosphate buffer pH 7.2 containing 150 mM sodium chloride and 0.1% BSA.

Sterilized by membrane filtration using a 0.22 µm Millex GV filter.

- **Purity**

More than 90% by SDS-Polyacrylamide gel electrophoresis.

- **Activity**

rhHGF stimulates the DNA synthesis of adult rat hepatocytes in primary culture.

- **Reconstitution and Storage**

Dilute to desired concentration with a buffer solution containing 0.1% BSA or a culture medium. Residual rhHGF solution (not diluted) should be stored in working aliquots at -70 °C for future use. It is stable for 6 months at -70 °C, and for a few days at 4 °C.

- **Caution**

For laboratory use only. Not for drug or household uses.

**Institute of Immunology Co., Ltd.**
