

# Fetal Bovine Serum Ultra-Low Endotoxin

## Best choice for your cells :

Endotoxins, i.e. LPS for E.Coli, are components of the walls of Gram-negative bacteria. They are released when the bacterial cell dies.

Their presence can interfere with biological parameters, as cell activation. Endotoxin-low FBS is used for LPS-sensitive cell lines, as macrophage and immune cells. :

- ◆ Lower endotoxin level : < 0,5 EU/ml
- ◆ Triple 0,1 µ Filtered
- ◆ Virus & Mycoplasma Tested
- ◆ Ideal for sensitive cells & Applications

## Applications :

- ◆ Cell culture
- ◆ Biotechnology research/production
- ◆ Vaccine manufacturing
- ◆ Cloning and animal diagnostics

Biowest performs a quantitative chromokinetic test, according to the European Pharmacopoeia Method D.  
This serum guarantees an endotoxin level < 0.1 EU/ml.

## Ordering information :

Cat n°	Product name
S1860-100	FBS South America, Ultra-low Endotoxin, 100ml
S1860-500	FBS South America, Ultra-low Endotoxin, 500ml
